

Name: *Sample Student*

Writing and Rhetoric Grades / Fall of 2013

Grades and Points (when “weight” is 1):

<u>A</u>	<u>A-</u>	<u>B+</u>	<u>B</u>	<u>B-</u>	<u>C+</u>	<u>C</u>	<u>C-</u>	<u>D+</u>	<u>D</u>	<u>D-</u>	<u>F</u>
12	11	10	9	8	7	6	5	4	3	2	1

Assignments	Weights	Grades	Points
Quiz 1	1	A+	13
Quiz 2	1	B-	8
Quiz 3	1	B	9
Exercises 1-8	2	A	24
Exercises 9-16	2	A-	22
Evaluation Argument	7	A-	77
Audio Evaluation	3	A	36
Local Argument	9	B	81
Global Argument	9	B-	72
Attend & Participate	1	A	12
Totals:	36		354

$$\text{Grade} = \frac{\text{Sum of Points}}{\text{Sum of Weights}} \quad \text{Grade} = \frac{354}{36} = 9.83 = 10 = \mathbf{B+}$$

As far as “rounding up” is concerned, I follow these guidelines: If a number ends in .50 or higher, it is rounded up; if it ends in .49 or lower, it is rounded down. For example, a 6.50 would be a 7 (C+), and a 10.49 would be a 10 (B+).
