

Hi guys,

I was a little confused on Thursday about how to make an mp3, but I figured it out. If you're on a Mac, you can follow these instructions:

1. Create Garageband file
2. In Garageband, Share-->Send song to iTunes
3. In iTunes, iTunes-->Preferences-->General
4. Click Import Settings
5. Dropdown menu called "Import Using"-->MP3 encoder-->Okay
6. Click on the clip in your iTunes Library
7. Advanced-->create mp3 version
8. Drag mp3 version to desktop
9. In your Dropbox folder in Sakai, click add-->upload files
10. choose file-->desired file from Desktop
11. Upload files now

Hope that helps; see you in class!
