Final Grade =  $\frac{\text{Sum of Points}}{\text{Sum of Weights}}$

Final Grade = \_\_\_\_\_

**These numbers have not been double-checked. They are estimations only. 12/9/10**

As far as “rounding up” grades is concerned, I follow these guidelines: If the final grade ends in .50 or higher, it will be rounded up; if it ends in .49 or lower, it will rounded down. For example, a 6.62 would be a 7 (C+), and a 10.43 would be a 10 (B+).
